

Thank you for your interest in our OGO® composting toilet.

We know that the space required by a toilet is an important factor in deciding for or against a model and that simply measuring with a folding rule sometimes does not give the whole picture.

You can print out this template on normal paper on four pages each, glue it together and possibly transfer it to solid cardboard. At the bottom you will find the information about the spacing of the grid.

Once you have selected the desired page, please select the following menu settings from the options in your Adobe Acrobat Reader:

Note: Each printer has a different setting for the print margin. After gluing the four sides together, please check the measurements.

Installation note: The OGO® composting toilet can be placed directly against the wall without any space.

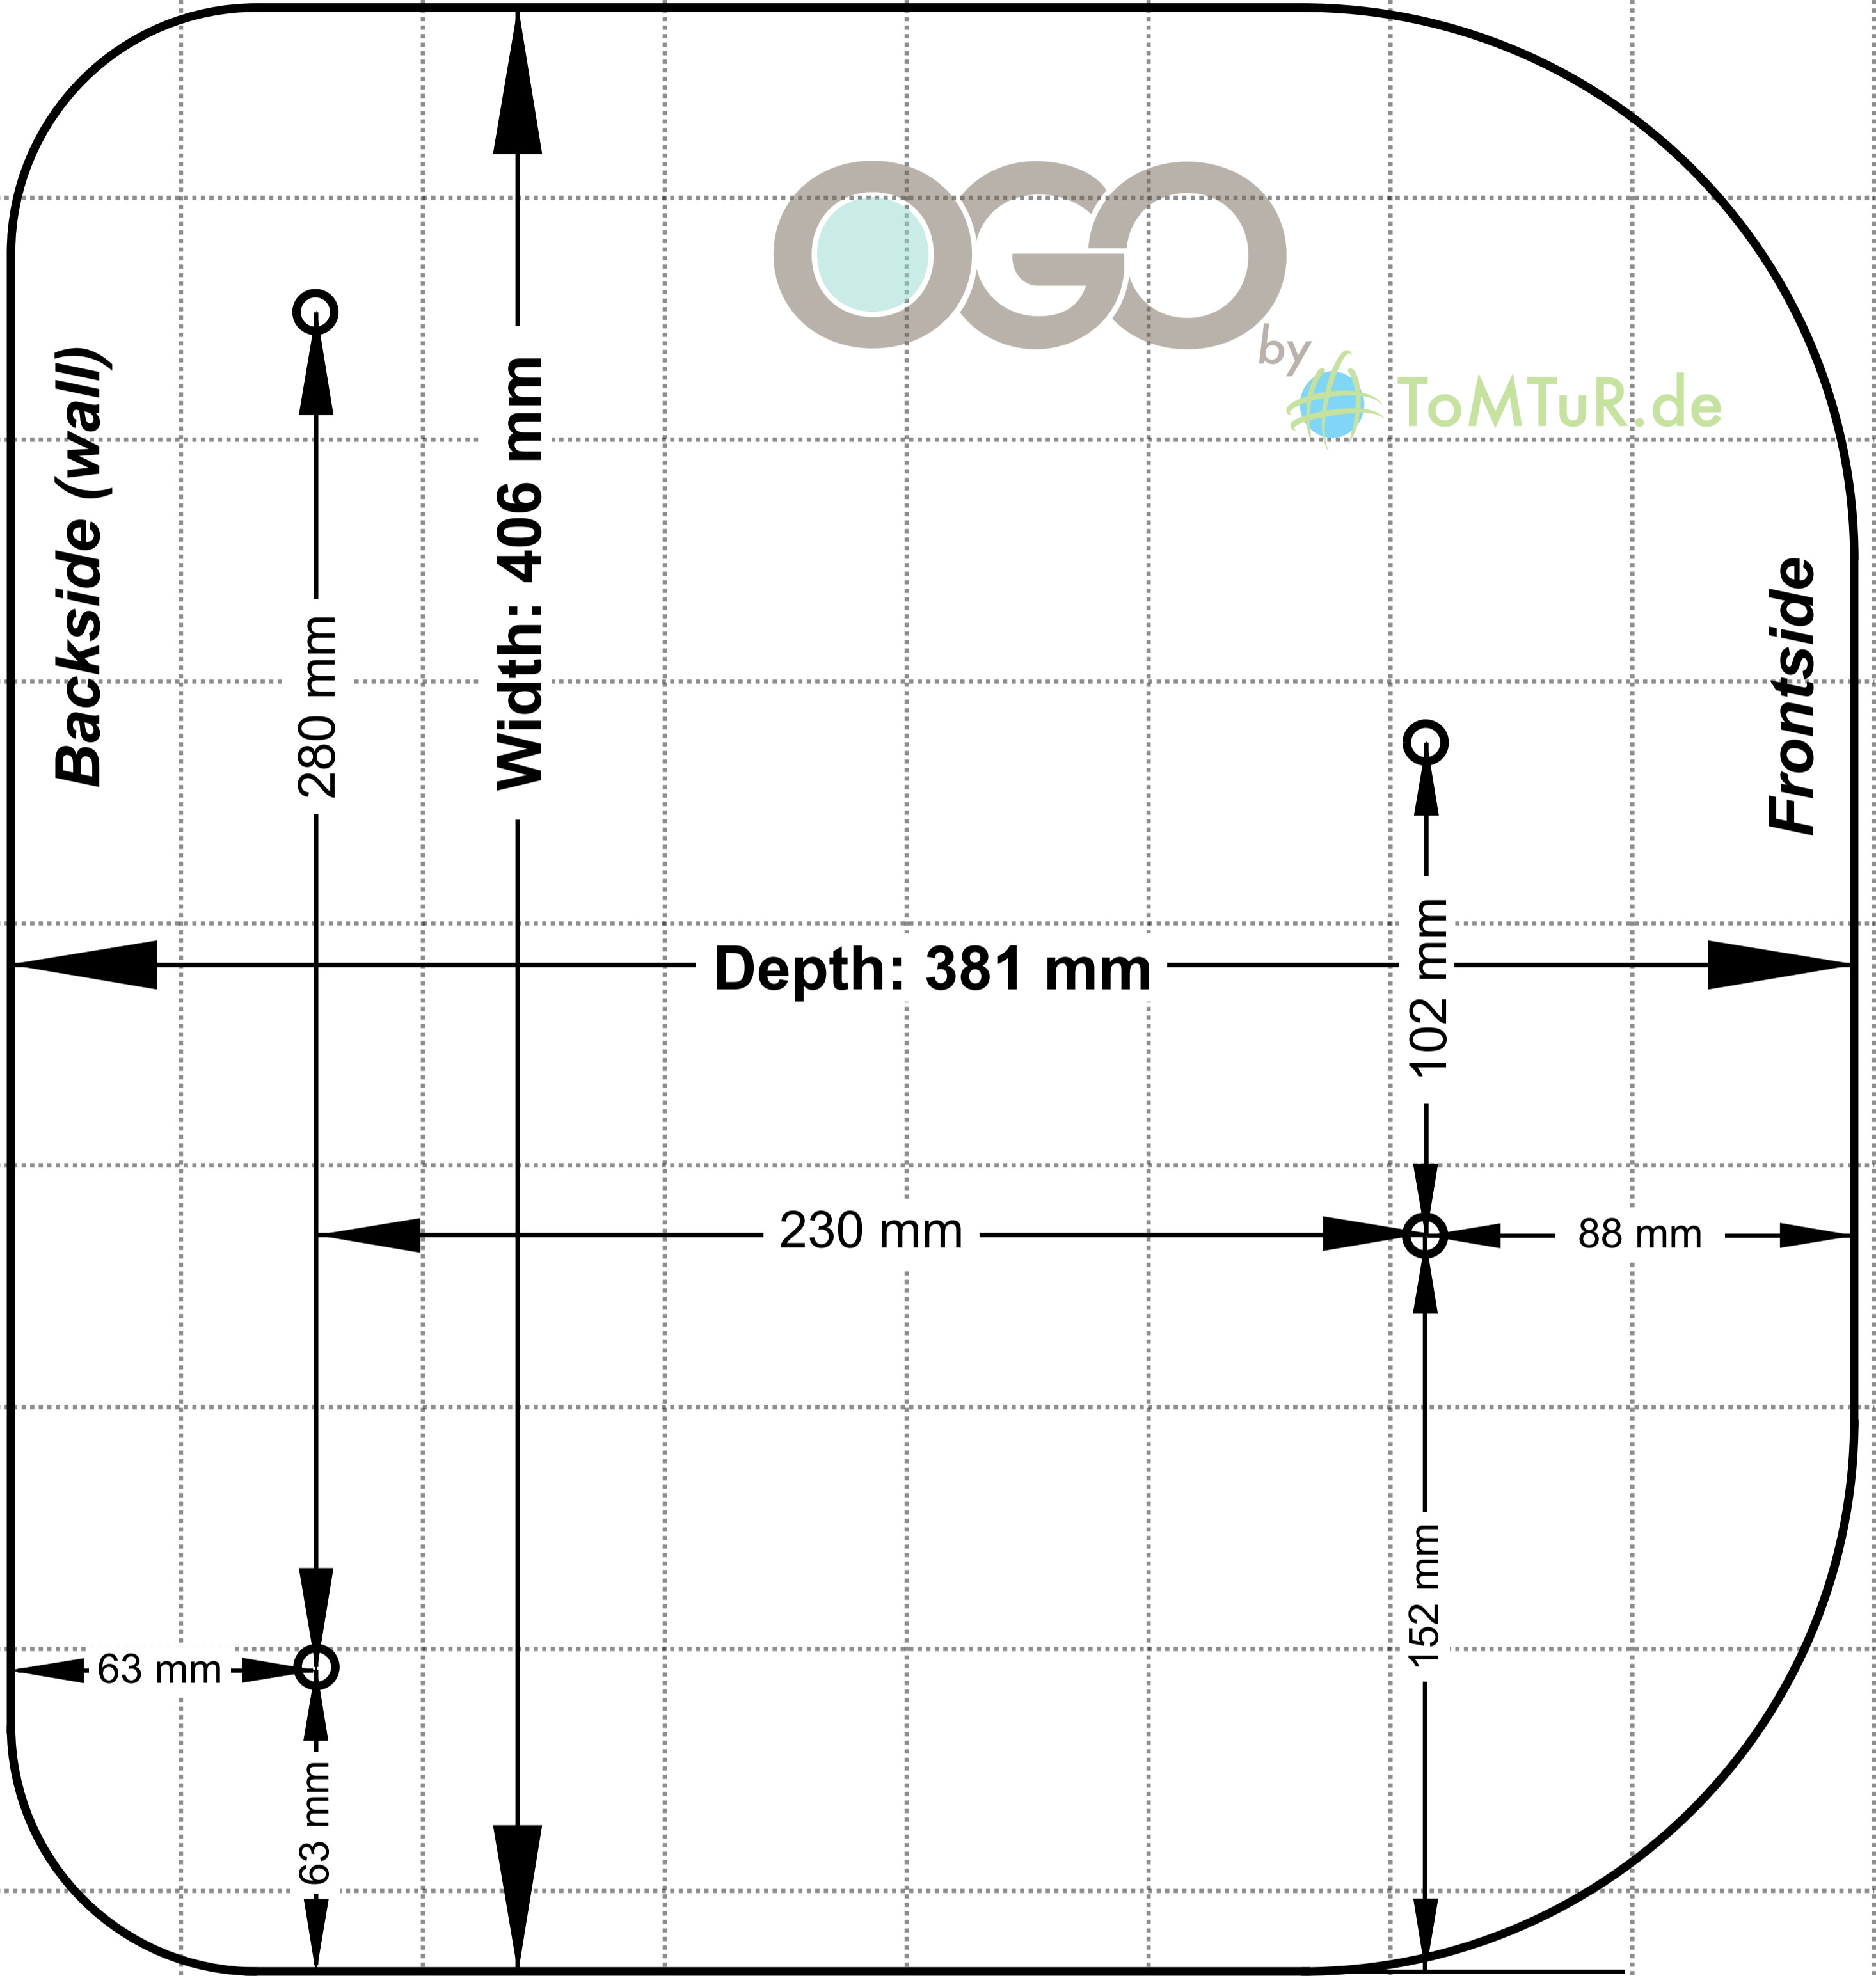

For more information on dimensions and installation, please visit our website:
